Silva J., Aptroot A. & Cáceres M. E. da S. 2023. — Lichens from dry central Brazil: a checklist of lichenized fungi from Distrito Federal and Goiás. *Cryptogamie, Mycologie* 44 (9): 117-133. <https://doi.org/10.5252/cryptogamie-mycologie2023v44a9>. <http://cryptogamie.com/mycologie/44/9>

## ABSTRACT

**KEY WORDS**  
Brazil,  
Cerrado,  
biodiversity,  
lichenized fungi,  
checklist,  
new records.

A checklist is presented listing the 191 lichen species currently known from the Brazilian state of Goiás, and 120 lichen species currently known from the Brazilian state of Distrito Federal. As many as 113 species are new reports to the state of Goiás, 49 are new reports from Distrito Federal and one, *Chapsa perdissuta* Sipman & Lücking, is new to Brazil. The new records are based on identifications of material from our own field trips in this dry Cerrado region. The area, about the size of Germany, is one of the last large regions on Earth from which no comprehensive lists of lichens were ever published.

## RÉSUMÉ

**MOTS CLÉS**  
Brésil,  
Cerrado,  
biodiversité,  
champignons lichénisés,  
liste de contrôle,  
signalements nouveaux.

*Lichens du Brésil central aride : liste des champignons lichénisés du « Distrito Federal » et du Goiás.*

Une liste des 191 espèces de lichens connues de l'état brésilien du Goiás et des 120 espèces connues de l'état du « Distrito Federal » est présentée. Pas moins de 113 espèces sont nouvelles pour l'état du Goiás et 49 pour celui du « Distrito Federal ». L'une de ces espèces, *Chapsa perdissuta* Sipman & Lücking, est nouvelle pour le Brésil. Les nouvelles identifications sont basées sur nos propres collectes menées dans la région sèche du Cerrado. Cette région, de la taille de l'Allemagne, est l'une des plus étendues pour lesquelles aucun inventaire extensif des lichens n'avait auparavant été publié.

## INTRODUCTION

Lichens are an important part of the biodiversity of tropical areas. However, the exploration of this diversity in Brazil has only started in earnest in this century. Very little lichen research has so far been carried out in the very central part of Brazil, made up by the state of Goiás and the Distrito Federal, and all work conducted there can still be regarded as pioneer work. The natural vegetation of this area is Cerrado, an evergreen vegetation with wet and dry season (Hueck 1972). The Distrito Federal is an enclave within the state of Goiás and accommodates the capital, Brasília, built in the last century. Until 1960, this area was almost all natural Cerrado vegetation. With a surface area of 350 000 km<sup>2</sup>, the state of Goiás is similar in size to Germany, Finland or Poland, and much larger than the British Isles.

Given this comparison in size, the known lichen biota of this area is much poorer than that of Germany or the British Isles, with over 2000 species each. In Goiás state (GO), only 77 lichen species have been reported, mainly in monographs of Parmeliaceae, such as *Hypotrachyna* (Vain.) Hale (Sipman *et al.* 2009), *Pseudoparmelia* Lynge (Elix & Nash 1998), and *Xanthoparmelia* (Vain.) Hale (Nash *et al.* 1995). In the Distrito Federal (DF), only 71 lichen species were known, mainly reported by Mistry (1998). No exhaustive lists within this area has been made before. Here, we provide such a list, mostly based on identifications by the second author. The results of the identifications of our collections served to assemble a baseline checklist of the lichens of this region.

## MATERIAL AND METHODS

In 2019, the first author collected lichens in the Parque Nacional de Brasília (DF) and in the Parque Nacional das Emas (GO), near Mineiros. The second author visited the Parque Nacional das Emas in April 2022, near Chapada do Céu. Specimens were observed in Campo Grande with an Olympus SZX7 with an attached Nikon Coolpix 995. Hand-made sections of ascomata and thallus were studied in water, 5% KOH and/or Lugol's reagent (1% I<sub>2</sub>) after pre-treatment with KOH. Microscopic observations were made using an Olympus BX50 with Nomarski interference contrast and an attached Nikon Coolpix 995. Chemical spot reactions were applied where needed. The majority of the specimens are preserved in ISE herbarium and received an ISE herbarium number, which is cited after the report, and a few (those with Aptroot collecting numbers) are preserved in CGMS herbarium.

## RESULTS AND DISCUSSION

The lichen biota from Goiás and Distrito Federal is typical to that found in other Cerrado regions. See e.g. Schumm & Aptroot (2023) for a selection of lichens found in the Cerrado regions in the Mato Grosso do Sul state. Several of the species reported below are illustrated and described there too. All in all, 191 species are now known from Goiás, and

120 species from Distrito Federal. Here, we report 49 additional species to Distrito Federal, based on collections made by the first author. As many as 113 species are first reports for Goiás state, based on collections by the first and second authors, and one species is new to Brazil.

### THE SPECIES IN DISTRÍTO FEDERAL

#### *Allographa acharii* (Fée) Lücking & Kalb

NEW REPORT. — Parque Nacional de Brasília, on bark, leg. J.A.R. Silva, ISE 52734. New to Distrito Federal.

#### *Amandinea extenuata* (Müll.Arg.) Marbach

PREVIOUS REPORT. — Mistry (1998).

#### *Bapalmuia confusa* Kalb & Lücking

NEW REPORT. — Parque Nacional de Brasília, on bark, leg. J.A.R. Silva, ISE 53245. New to Distrito Federal.

#### *Bathelium madreporiforme* (Eschw.) Trevis.

NEW REPORT. — Parque Nacional de Brasília, on bark, leg. J.A.R. Silva, ISE 53042. New to Distrito Federal.

#### *Brigantiaea leucoxantha* (Spreng.) R.Sant. & Hafellner

NEW REPORT. — Parque Nacional de Brasília, on bark, leg. J.A.R. Silva, ISE 52529. New to Distrito Federal.

#### *Bulbothrix apophysata* (Hale & Kurok.) Hale

PREVIOUS REPORT. — Mistry (1998).

#### *Bulbothrix bulbochaeta* (Hale) Hale

PREVIOUS REPORT. — Mistry (1998).

#### *Bulbothrix coronata* (Fée) Hale

THE SPECIES IN GOIÁS

*Acanthotrema brasilianum* (Hale) Frisch

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 53824. New to Goiás.

*Allographa acharii* (Fée) Lücking & Kalb

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 52740. New to Goiás.

*Allographa sauroidea* (Leight.) Lücking & Kalb

PREVIOUS REPORT. — Staiger (2002).

*Amandinea endachroa* (Malme) Marbach

PREVIOUS REPORT. — Marbach (2000).

*Amandinea melaxanthella* (Nyl.) Marbach

PREVIOUS REPORT. — Marbach (2000).

*Arthonia parantillarum* Aptroot

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 53498. New to Goiás.

*Astrothelium aeneum* (Eschw.) Aptroot & Lücking

NEW REPORT. — Chapada do Céu, Parque Nacional das Emas, on bark, leg. A. Aptroot *s.n.* New to Goiás.

*Astrothelium macrocarpum* (Fée) Aptroot & Lücking

PREVIOUS REPORT. — Müller (1895).

*Astrothelium pblyctaena* (Fée) Aptroot & Lücking

NEW REPORT. — Chapada do Céu, Parque Nacional das Emas, on bark, leg. A. Aptroot *s.n.* New to Goiás.

*Baculifera intermedioides* Marbach

PREVIOUS REPORT. — Marbach (2000).

*Baculifera pseudomicromera* Marbach

PREVIOUS REPORT. — Marbach (2000).

*Bathelium madreporiforme* (Eschw.) Trevis.

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 52860. New to Goiás.

*Buellia rubroreagens* A.Nordin

PREVIOUS REPORT. — Nordin (2000).

*Bulbothrix apophysata* (Hale & Kurok.) Hale

NEW REPORT. — Chapada do Céu, Parque Nacional das Emas, on bark, leg. A. Aptroot 85592. New to Goiás.

*Bulbothrix coronata* (Fée) Hale

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 53762. New to Goiás.

*Bulbothrix fungicola* (Lynge) Hale

PREVIOUS REPORT. — Marcelli (1993).

*Bulbothrix goebelii* (Zenker) Hale

PREVIOUS REPORT. — Benatti & Elix (2012).

*Bulbothrix regnelliana* Jungbluth, Marcelli & Elix

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 53757. New to Goiás.

*Bulbothrix subcoronata* (Müll.Arg.) Hale

PREVIOUS REPORT. — Hale (1976).

*Bulbothrix subdissecta* (Nyl.) Hale

PREVIOUS REPORT. — Benatti & Elix (2012).

*Bulbothrix tabacina* (Mont. & Bosch) Hale

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 53779. New to Goiás.

*Bulbothrix viatica* Spielmann & Marcelli

PREVIOUS REPORT. — Spielmann & Marcelli (2008).

NEW REPORT. — Chapada do Céu, Parque Nacional das Emas, on bark, leg. *A. Aptroot s.n.*

*Byssoloma leucoblepharum* (Nyl.) Vain.

PREVIOUS REPORT. — Kalb & Vězda (1990).

*Byssoloma rubrireagens* Kalb & Vězda

PREVIOUS REPORT. — Kalb & Vězda (1990).

*Byssoloma subdiscordans* (Nyl.) P. James

PREVIOUS REPORT. — Kalb & Vězda (1990).

*Calicium salicinum* Pers.

PREVIOUS REPORT. — Tibell (1996).

*Calopadia chacoensis* (Malme) Kalb & Vězda

PREVIOUS REPORT. — Kalb & Vězda (1987).

*Calopadia foliicola* (Fée) Vězda

PREVIOUS REPORT. — Kalb & Vězda (1987).

*Caloplaca granularis* (Müll.Arg.) Zahlbr.

NEW REPORT. — Chapada do Céu, Parque Nacional das Emas, on bark, leg. *A. Aptroot s.n.* New to Goiás.

*Candelaria concolor* (Dicks.) Stein

NEW REPORT. — Chapada do Céu, Parque Nacional das Emas, on bark, leg. *A. Aptroot s.n.* New to Goiás.

*Canoparmelia caroliniana* (Nyl.) Elix & Hale

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 53767. New to Goiás.

*Canoparmelia texana* (Tuck.) Elix & Hale

NEW REPORT. — Chapada do Céu, Parque Nacional das Emas, on bark, leg. *A. Aptroot s.n.* New to Goiás.

*Chapsa discoides* (Fr.) Lücking

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 53091. New to Goiás.

*Chapsa perdissuta* Sipman & Lücking

NEW REPORT. — Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 52626. New to Brazil.

*Chrysothrix xanthina* (Vain.) Kalb

NEW REPORT. — Chapada do Céu & Mineiros, Parque Nacional das Emas, on bark, leg. J.A.R. Silva, ISE 53271. New to Goiás.

*Cladia aggregata* (Sw.) Nyl.

PREVIOUS REPORT. — Ahti (2000).

PREVIOUS REPORT. — Nash *et al.* (1995).

*Xanthoparmelia succedans* Elix & J.Johnst.

PREVIOUS REPORT. — Nash *et al.* (1995).

**Acknowledgements**

All specimens were collected with permits and are kept in the Brazilian herbaria CGMS and ISE. This study was financed in part by the Coordenação de Aperfeiçoamento de Pessoal de Nível Superior – Brasil (CAPES) – Finance Code 001 who provided a visiting professorship to the second author. The costs of the collecting expeditions were partly financed by grants from the Conselho Nacional do Pesquisa to MESC (437097/2018-8) and a research grant to MESC (307569/2019-5).
