PALEVOL

Volume 15 (2016) – No. 6 – July–August

Cover illustration. Left, washing-sifting of sediments in the Arlanzón River during the excavation campaign at Atapuerca. Photo credit : Jordi Mestre, IPHES). Right, microvertebrate remains from the Portalón deposit (Late Pleistocene, Sierra de Atapuerca, Spain). Photo credit: Javier Rubio García, Paleoymás.

Illustration de la couverture. À gauche, lavage-tamassage de sédiments dans la rivière Arlanzón lors de la campagne de fouille à Atapuerca (Espagne). Crédit photo : Jordi Mestre, IPHES. À droite, restes de microvertébrés du gisement de Portalón (Pléistocène supérieur, sierra d'Atapuerca, Espagne). Crédit photo : Javier Rubio García, Paleoymás.

Thematic issue / Numéro thématique :

Small vertebrates and the biochronology, biostratigraphy, and paleoecology of the Quaternary

Les petits vertébrés et la biochronologie, biostratigraphie et paléoécologie du Quaternaire

Guest Editors / Rédacteurs en chef invités : **Gloria Cuenca-Bescós, Juan Manuel López-García, Hugues-Alexandre Blain**

- Small vertebrates and the biochronology, biostratigraphy and paleoecology of the Quaternary
Gloria Cuenca-Bescós, Juan Manuel López-García, Hugues-Alexandre Blain 615
- Mammals (Early Pleistocene and biostratigraphy)***
- Updated Atapuerca biostratigraphy: Small-mammal distribution and its implications for the biochronology of the Quaternary in Spain
Gloria Cuenca-Bescós, Hugues-Alexandre Blain, Juan Rofes, Juan Manuel López-García, Iván Lozano-Fernández, Julia Galán, Carmen Núñez-Lahuerta 621
- Paleoeological and microenvironmental aspects of the first European hominids inferred from the taphonomy of small mammals (Sima del Elefante, Sierra de Atapuerca, Spain)
Maria Bennàsar, Isabel Cáceres, Gloria Cuenca-Bescós 635
- The fossil bat assemblage of Sima del Elefante Lower Red Unit (Atapuerca, Spain): First results and contribution to the palaeoenvironmental approach to the site
Julia Galán, Gloria Cuenca-Bescós, Juan Manuel López-García 647

Contents (continued)

- Paleoenvironmental reconstruction of the Early Pleistocene site of Quibas (SE Spain) using a rodent assemblage
Pedro Piñero, Jordi Agustí, Hugues-Alexandre Blain, César Laplana 659

- Mammals (Late Pleistocene)***
- Small and large mammals from the Ciota Ciara cave (Borgosesia, Vercelli, Italy): An Isotope Stage 5 assemblage
Claudio Berto, Davide Bertè, Elisa Luzi, Juan Manuel López-García, Andrea Pereswiet-Soltan, Marta Arzarello 669
- New data on Late Pleistocene small vertebrates from northern France
Emmanuelle Stoetzel, Héloïse Koehler, Dominique Cliquet, Noémie Sévêque, Patrick Auguste 681
- Cold-climate rodent indicators for the Late Pleistocene of Central Iberia: New data from the Buena Pinta Cave (Pinilla del Valle, Madrid Region, Spain)
César Laplana, Paloma Sevilla, Hugues-Alexandre Blain, Mari Carmen Arriaza, Juan Luis Arsuaga, Alfredo Pérez-González, Enrique Baquedano 696
- Palaeoecological implications of rodents as proxies for the Late Pleistocene-Holocene environmental and climatic changes in northeastern Iberia
Mónica Fernández-García, Juan Manuel López-García, Carlos Lorenzo 707

- Reptiles, amphibians and fishes***
- Dynamics of East European modern amphibian and reptile species distribution areas and their potential use in Quaternary stratigraphy
Viatcheslav Yu. Ratnikov 721
- The geographical and chronological pattern of herpetofaunal Pleistocene extinctions on the Iberian Peninsula
Hugues-Alexandre Blain, Salvador Bailon, Jordi Agustí 731
- Fish remains from the Neolithic site of El Mirador cave (Atapuerca, Spain): Seasonality and resource management
Àngel Blanco-Lapaz, Josep Maria Vergès 745
