

COMPTES RENDUS PALEVOL

Volume 18 (2019) – No. 7 – October–November

Cover illustration: Original drawing by Jean-Claude Rage of the holotype vertebra of *Palaeophis africanus* that was described by Andrews in 1924. Specimen NHMUK PV R 4964 (British Museum) from the Lutetian of Niger.

Illustration de couverture : Dessin inédit par Jean-Claude Rage de la vertèbre holotype de *Palaeophis africanus* décrite par Andrews en 1924. Spécimen NHMUK PV R 4964 (British Museum) du Lutétien du Niger.

Thematic issue / Numéro thématique :

Palaeobiology and palaeobiogeography of amphibians and reptiles: An homage to Jean-Claude Rage Part I

Paléobiologie et paléobiogéographie des amphibiens et reptiles : un hommage à Jean-Claude Rage 1^{re} partie

Guest editors / Rédacteurs en chef invités : **Annelise Folie, Eric Buffetaut, Nathalie Bardet, Alexandra Houssaye, Emmanuel Gheerbrant & Michel Laurin**

- *Avant-propos* / Foreword
Annelise Folie, Eric Buffetaut, Nathalie Bardet, Alexandra Houssaye, Emmanuel Gheerbrant, Michel Laurin 693
- Early tetrapodomorph biogeography: Controlling for fossil record bias in macroevolutionary analyses
Jacob D. Gardner, Kevin Surya, Chris L. Organ 699
- High ecomorphological diversity among Early Cretaceous frogs from a large subtropical wetland of Iberia
Raúl O. Gómez, Andres I. Lires 711
- A new pipoid frog (Anura, Pipimorpha) from the Paleogene of Patagonia. Paleobiogeographical implications
Alexis M. Aranciaga Rolando, Federico L. Agnolin, Julián Corsolini 725
- The first juvenile specimen of *Eolacerta* (Squamata: Eolacertidae) from the early–middle Eocene of the Messel Pit (Germany)
Andrej Čerňanský, Krister T. Smith 735

Continued on the next page

Contents (continued)

• The taxonomy, chronostratigraphy and paleobiogeography of glyptosaurine lizards (Glyptosaurinae, Anguidae) Robert M. Sullivan	747
• A new species of <i>Lapparentophis</i> from the mid-Cretaceous Kem Kem beds, Morocco, with remarks on the distribution of lapparentophiid snakes Romain Vullo	765
• A new Late Cretaceous snake from Patagonia: Phylogeny and trends in body size evolution of madtsoiid snakes Raúl O. Gómez, Fernando F. Garberoglio, Guillermo W. Rougier	771
• Adaptation of the vertebral inner structure to an aquatic life in snakes: Pachyophiid peculiarities in comparison to extant and extinct forms Alexandra Houssaye, Anthony Herrel, Renaud Boistel, Jean-Claude Rage	783
• Poor but classic: The squamate fauna from the late Miocene of Pikermi, near Athens, Greece Georgios L. Georgalis	801
• A contribution to the herpetofauna from the late Miocene of Gritsev (Ukraine) Zbyněk Roček	817
• Amphibians and squamate reptiles from the late Pleistocene of the “Caverne Marie-Jeanne” (Hastière-Lavaux, Namur, Belgium): Systematics, paleobiogeography, and paleoclimatic and paleoenvironmental reconstructions Hugues-Alexandre Blain, Almudena Martínez Monzón, Juan Manuel López-García, Iván Lozano-Fernández, Annelise Folie	849
• First record of <i>Diplocynodon ratelii</i> Pomel, 1847 from the early Miocene site of Tušimice (Most Basin, Northwest Bohemia, Czech Republic) Àngel H. Luján, Milan Chroust, Andrej Čerňanský, Josep Fortuny, Martin Mazuch, Martin Ivanov	877
• Thyreophoran vertebrae from the Callovian (Middle Jurassic) of the Vaches Noires cliffs (Normandy, France), with remarks on the dinosaur assemblage from the Vaches Noires Eric Buffetaut, Jérôme Tabouelle	891
• Enigmatic teeth from the Jurassic–Cretaceous transition of Morocco: The latest known non-mammaliaform cynodonts (Synapsida, Cynodontia) from Africa? Maxime Lasseron	897
