- Pour chaque année cette revue comporte deux parties :
- Bibliographie thématique.
 - Références bibliographiques.

Les références, qui sont classées par ordre alphabétique et sont numérotées, figurent dans les différentes rubriques de la partie thématique. Dans le thème “Systématique” les noms des genres nouveaux et des familles nouvelles sont soulignés.

Les compléments de l'année 2000 font suite à un article des mêmes auteurs publié dans *Cryptogamie, Mycologie*, 2002, 23 (2) : 169-180.
