

Smith et al., SOM 4. Coevolution between cecum (above) and appendix (below). Because of the number of taxa, this appendix should be viewed on-screen, at high magnification. Evolutionary time in million years (Ma) is indicated to the right of the lower tree. Branches outlined in a thin red line represent taxa added to the tree of Bininda-Emonds et al. (2007, 2008). The absence of data boxes (between branch tips and names) indicates missing data. Abbreviations: K/Pg, Cretaceous/Paleogene.
