

Table of contents

| | | |
|----|---|----|
| 7 | Acknowledgements | |
| 9 | Preface | |
| | The Nile Valley: environmental refugium or corridor of dispersals? | |
| | Alice Leplongeon, Mae Goder-Goldberger & David Pleurdeau | |
| | A brief history of Palaeolithic research in the Nile Valley | 9 |
| | Main issues in the Palaeolithic archaeological record of the Nile Valley | 11 |
| | Introduction of the monograph themes | 12 |
| | The Nile Valley and adjacent deserts | 13 |
| | North Africa, the Levant and eastern Africa | 14 |
| | Part 1 | |
| 17 | The Nile Valley and adjacent deserts | |
| 19 | Water, wind, ice and sea: Prehistoric environments in the Nile Basin between 75,000 and 15,000 years | |
| | Martin Williams | |
| | Introduction | 19 |
| | Global climatic cycles | 22 |
| | The Blue Nile and Atbara headwaters | 25 |
| | The White Nile headwaters and lower White Nile valley | 29 |
| | The Gezira alluvial fan and Blue Nile distributary channels | 31 |
| | The Red Sea Hills and the Desert Nile | 32 |
| | The Nile Delta and the Nile Cone | 34 |
| | Conclusion | 36 |
| | Acknowledgements | 37 |

| | | |
|----|---|-----|
| 39 | Evidence for Pleistocene habitability and occupations in the Western Desert of Egypt, MIS 4 through early MIS 2 | |
| | Maxine R. Kleindienst, Mary M.A. McDonald, Anne R. Skinner, Bonnie A.B. Blackwell & Marcia F. Wiseman | |
| | Introduction | 39 |
| | Linking the Nile Valley and the Western Desert | 41 |
| | Water availability and desert habitability: the ‘Empty Desert Hypothesis’ | 43 |
| | Evidence for later Late Pleistocene occupations | 46 |
| | The Khargan Complex quandary | 63 |
| | Later Stone Age units | 66 |
| | Conclusions, and a cautionary tale | 68 |
| | Note | 68 |
| | Acknowledgements | 68 |
| 71 | Age of the Late Middle Palaeolithic Nile aggradation: The Khormusan and the Atmur El Kibeish Aterian | |
| | Romuald Schild, Christopher L. Hill & Andrzej Bluszcz | |
| | Introduction | 71 |
| | The LMP aggradation | 74 |
| | The Late Palaeolithic depositional suite | 76 |
| | Evidence for Last Interglacial (MIS 5e-MIS 5a) lakes in the Atmur El Kibeish peneplain and southern Egypt | 78 |
| | Evidence for MIS 5-MIS 2 lakes in the New Valley and the Aterian in the Western Desert | 87 |
| | Proposing an age for the LMP aggradation | 89 |
| | Conclusions | 90 |
| | Acknowledgements | 91 |
| 93 | The Sudanese Nile Valley: The ultimate frontiers of the Aterian and the northern and southern Out of Africa routes of early anatomically modern humans | |
| | Elena A.A. Garcea | |
| | Introduction | 93 |
| | The ultimate frontiers of the Aterian | 95 |
| | Khor Abu Anga | 97 |
| | Magendohli | 98 |
| | Western Sudan | 98 |
| | Additional occurrences | 102 |
| | Northern Sudan, 102 — Central Sudan, 103. | |
| | Sudan’s contributions to the northern and southern Out of Africa routes of early anatomically modern humans | 108 |
| | Discussion | 111 |
| | Final remarks | 112 |
| | Acknowledgements | 113 |

| | | |
|-----|--|-----|
| 115 | Upper Nubia and beyond during the TerminalPleistocene: New premises for the late occurrence of the Middle Stone Age | |
| | Piotr Osypiński | |
| | Introduction | 115 |
| | Current trends in lithic analysis - brief overview of methods used for the Affad assemblage analysis | 117 |
| | The case of Affad - presentation of results | 119 |
| | Seasonality of Late Pleistocene settlement in Affad | 119 |
| | Variants of Levallois methods in Affad | 121 |
| | Issue of blade and microlithic variants of tool blank production | 125 |
| | Educational dimension of the lithics | 129 |
| | Phenomenon of collection of stone artefacts and their reutilisation at Pleistocene sites | 130 |
| | Dating the Affad assemblages | 131 |
| | Discussion: Nubian industries from the Affad evidence | 133 |
| | Conclusions | 135 |
| 139 | Human occupation density and mobility in the lower Nile Valley (75,000-15,000 years ago) | |
| | Pierre M. Vermeersch | |
| | Introduction | 139 |
| | Method | 139 |
| | The Egyptian MSA along the Nile Valley | 140 |
| | MSA | 140 |
| | MSA chronology | 141 |
| | MSA occupational density | 145 |
| | Upper Palaeolithic | 146 |
| | The environment | 146 |
| | Upper Palaeolithic | 146 |
| | Late Palaeolithic | 149 |
| | The Late Palaeolithic taxonomic entities | 149 |
| | Discussion | 152 |
| | Conclusion | 156 |
| | Supplementary information | 157 |

Part 2

| | |
|-----|---|
| 159 | Neighbouring regions: North Africa, eastern Africa and the Levant |
| 161 | Cultural transitions in the Middle Stone Age and Later Stone Age records of Northwest Africa: An overview from Morocco |
| | Abdeljalil Bouzouggar, Louise Humphrey & Nick Barton |

| | |
|--|-----|
| Introduction | 161 |
| Definition, origin and chronology of the Northwest African MSA | 161 |
| The Iberomaurusian | 164 |
| Indigenous development | 165 |
| Exogenous development | 165 |
| Continuity with the Middle Stone Age | 166 |
| Potential transitions within the Northwest African Middle Stone Age | 167 |
| 300,000 years-145,000 years | 167 |
| 145,000 years-60,000 years | 167 |
| 60,000 to 30,000 years | 171 |
| 30,000 to 15,000 years | 171 |
| 15,000-12,700 years | 173 |
| Concluding discussion | 174 |
| Acknowledgements | 175 |

177 **Review of chronological data from the Rabat-Témara caves (Morocco): Implications for understanding human occupation in north-west Africa during the Late Pleistocene**

Eslem Ben Arous, Christophe Falguères, Roland Nespoulet & Mohamed Abdeljalil El Hajraoui

| | |
|--|-----|
| Introduction | 177 |
| Available stratigraphies in the Témara region: an overview | 179 |
| Témara caves: Stratigraphy and dating | 184 |
| Dar es Soltan 1 | 184 |
| Dar es Soltan 2 | 184 |
| El Harhoura 1 | 185 |
| El Harhoura 2 | 186 |
| El Mnasra | 195 |
| Contrebandiers | 195 |
| Chaperon-Rouge open-air site | 197 |
| Same fillings, same mixing problems: A limitation with regard to OSL and ESR dating | 198 |
| Chronological comparison | 198 |
| Chronological data from the Témara caves: | |
| A heterogeneous framework for the end of the MSA | 198 |
| Upland sequences | 199 |
| Climate and human mobility between coastal and inland areas | 200 |
| Conclusion | 200 |
| Acknowledgements | 201 |

203 **Sedimentary and Human Responses to Aridity in Mediterranean Caves: The MIS 4-2 Record of the Haua Fteah (Cyrenaica, Northeast Libya)**

Lucy Farr, Robyn Inglis & Graeme Barker

| | |
|--|-----|
| Introduction | 203 |
| The Haua Fteah 1950s and recent excavations | 204 |
| The Pleistocene sedimentary sequence | 208 |
| Description | 208 |
| Climatic interpretations | 211 |

| | | |
|------|---|-----|
| | Sedimentary hiatuses and human behaviour | 214 |
| | Conclusion | 218 |
| | Acknowledgements | 219 |
| | | |
| 221 | The Middle to Upper Palaeolithic transition as seen from Far'ah II and Boker Tachtit, Israel: Does it relate to the Nile Valley? | |
| | Mae Goder-Goldberger | |
| | Introduction | 221 |
| | The Late Middle Palaeolithic | 223 |
| | The onset of the Upper Palaeolithic | 230 |
| | The technological transition as evident from the Levantine desert region | 230 |
| | A view from the Nile Valley | 235 |
| | Concluding remarks | 237 |
| | Acknowledgements | 237 |
| | | |
| 239 | The Lithic Technologies of the Epipalaeolithic Hunter-Gatherers in the Negev, Israel: Implications from Refitting Studies | |
| | Ofer Marder & A. Nigel Goring-Morris | |
| | Introduction | 239 |
| | The Epipalaeolithic chrono-stratigraphic framework | 242 |
| | Early Epipalaeolithic (25-18.5 ka cal BP) | 242 |
| | Kebaran Complex (22-18.5 ka cal BP), 242 — Nizzanan (20-18.7/5 ka cal BP), 243 | |
| | Middle Epipalaeolithic (18.5-15 ka cal BP) | 243 |
| | Mushabian (<i>c.</i> 18.5/17.75-15 ka cal BP), 244 — Ramonian (17.75-15 ka cal BP), 245 | |
| | Late Epipalaeolithic | 245 |
| | The refitted assemblages | 246 |
| | Results | 249 |
| | The microlithic chaîne opératoire | 250 |
| | Raw Material Exploitation, 250 — Core Shaping-out, 251 — Blank Production, 255 | |
| | — Core Maintenance and Discard, 257 — Microlith Production, 260 | |
| | Discussion | 264 |
| | Summary and concluding remarks | 267 |
| | Acknowledgements | 267 |
| | | |
| 269 | The Horn of Africa at the end of the Pleistocene (75-12 ka) in its macroregional context | |
| | Alice Leplongeon, Clément Ménard, Katja Douze, Behailu Habte, François Bon & David Pleurdeau | |
| | Introduction | 269 |
| | Before the Big Dry (75-29 ka): increased technological variability | 271 |
| | The Horn of Africa during the Big Dry (MIS 2, 29-15 ka): a scarcely inhabited region? | 274 |
| | After the Big Dry (15-12 ka): variability in the LSA, diversification of subsistence strategies | 276 |

| | |
|---|-----|
| Discussion | 280 |
| A late MSA/LSA transition in the Horn of Africa? | 280 |
| The Horn of Africa: a crossroad region? | 281 |
| Conclusion | 283 |
| Acknowledgement | 283 |

| | |
|-----|--|
| 285 | Postface |
| | Mae Goder-Goldberger, Alice Leplongeon & David Pleurdeau |
